

DESCRIPTION

COXRIVAL (salinomycin) is an ionophore anticoccidial for use in chickens to prevent coccidiosis caused by *Eimeria tenella*, *E. necatrix*, *E. acervulina*, *E. maxima*, *E. brunetti* and *E. mivati*.

CoxRival is a premix containing 120g salinomycin per kg.

PRODUCT FEATURES

- ▶ Provides reliable protection against coccidiosis, acting on three stages of the parasite's life cycle.
- ▶ Control of carrier particle size and dust helps minimize fines and clumping.
- ▶ Readily assayed in the finished feed.
- ▶ Proven stability under modern feed milling conditions.

DIRECTION FOR USE

Provide salinomycin concentration 60 g/ton (500 g per ton) for the prevention of coccidiosis in broilers, roaster and replacement chickens caused by *Eimeria tenella*, *E. necatrix*, *E. acervulina*, *E. maxima*, *E. brunetti* and *E. mivati*.

Feed continuously as sole ration. Do not feed to birds producing eggs for human consumption. May be fatal if accidentally fed to adult turkeys or horses.

Withdrawal Period: 0 day

Package Size: 25kg/bag

Storage conditions: Store in a cool, dry and well-ventilated area

Shelf life: 2 years

Be Healthier. Be Brighter.
