

MaduraMAGIC

DESCRIPTION

MaduraMagic is a premix containing 10g maduramicin ammonium activity per kg in a carrier suitable for feed additive.

Maduramicin is a monovalent glycoside polyether ionophore antibiotic. It induces an anticoccidial effect on the asexual forms (sporozoites, merozoites and falciform bodies) of

FEATURES

- ▶ Broad-spectrum anticoccidial drug.
- ▶ Will not affect the immune competence of chickens on recommended dosage.

DIRECTION FOR USE

For the prevention of coccidiosis caused by *Eimeria spp.* in broiler chickens. Thoroughly mix MaduraMagic into feed at a level of 500 g per ton of feed to obtain a concentration of 5 mg Maduramicin ammonium per kg of feed.

Withdrawal Period: 5 days

Package 25kg/bag

Storage conditions: Store in a cool, dry and well-ventilated area

Shelf life: 2 years
